**FOR IMMEDIATE RELEASE****New ISO 9001:2015 Certification**

*Flagship Product Now Fully Certified*

**Danbury, Connecticut, USA, July 14, 2023** – Accutrol LLC is proud to announce that their award-winning AccuValve® is now ISO 9001:2015 certified. This certification is awarded through the TÜV SÜD AMERICA INC. certification body for the AccuValve's design, manufacturing and supply. "Since the beginning, we have strived to deliver the highest quality products and services to our customers. This certification confirms our commitment through a respected outside accrediting body," commented Accutrol's Timothy Berry, Vice President of Sales.

The AccuValve is the industry's first new airflow control valve built for critical environments within the last 40 years. Its high quality, low pressure drop design delivers superior airflow control to the most critical spaces. The ISO 9001:2015 certification represents Accutrol's commitment to safety and high standards in engineering for each and every valve.

**About Accutrol, LLC** – Accutrol is a manufacturer of world class air flow measurement and control products. Their innovative technologies are used in critical environments and other specialized applications where the demands for 21<sup>st</sup> century sustainable airflow design is crucial. Their flagship products include the AHR Innovation Award winning AccuValve® low pressure drop air flow control valve, the AHR Innovation Award winning AVC Fume Hood Control System, the VorTek™ line of airflow measurement products and the Iso-Tek® Room Pressure Monitor.
